RESEARCH PROGRAM	32020000000000												
OO : Higher education research improved to promote economic productivity and innovation													
Outcome Indicator(s)													
1. Number of research outputs in the last three years utilized by the industry or by other beneficiaries		1	1	2	2	6	2	1			3	-3	Q1: Over the past three years, NORSU has collaborated closely with various Agrarian Reform Beneficiary Organizations (ARBOs) through the Department of Agrarian Reform (DAR) to leverage research and innovation for product development. Through these collaborations, NORSU has played a pivotal role in empowering ARBOs to enhance their agricultural practices, improve product quality, and explore new market opportunities. By providing valuable research insights and innovative solutions, NORSU has helped these organizations maximize their productivity and competitiveness in the market. Q2: The research output applied by the industry remains unchanged from what was identified in the first quarter. To address this, a comprehensive catch-up plan has been developed, which includes: a) Enhancing the execution of extension projects grounded in research; b) Encouraging faculty members to undertake relevant research that align with their Individual Performance Commitment and Review (IPCR) objectives; c) Rigorously enforcing university directives, specifically regarding research activities.
Output Indicator(s)													
1. Number of research outputs completed within the year		10	10	10	12	42	1	20			21	-21	Q1: The first quarter's completed research output did not meet the target because the researchers are still in the process of conducting their research. They are actively working on their projects, and completion is expected within the year. The Research Office is constantly monitoring the progress of their research activities. Q2: The target was doubled due to the influx of completed research projects emerging from the graduate school. This includes the theses from both master's and doctorate students who graduated in June.
2. Percentage of research outputs published in internationally-refereed or CHED recognized journal within the year		12.00%	17.00%	19.00%	21.00%	69.00%	0.00%	7.00%			7.00%	-62.00%	Q1: The target for published research output for the first quarter was not met because the researchers are still in the process of preparing their completed research for publication. This involves writing up their findings, formatting them according to the publication guidelines, and submitting them to journals or other outlets for review. While this process can be time-consuming, it is a crucial step in ensuring the quality and impact of the research. It's important to support the researchers in this phase and provide them with the necessary resources, time, and guidance to help them meet the publication target. Q2: Publishing research projects can be time-consuming and challenging process, varying greatly with each journal's requirements. A significant number of faculty members who have completed their research find themselves in the throes of preparing their manuscripts for publication. To facilitate this process, a comprehensive catch-up plan has been proposed. This plan entails: a) Conducting a workshop that provides faculty members the opportunity to craft their research findings into a format suitable for publication; b) Offering dedicated mentoring support to faculty researchers, particularly aimed at those in the process of writing for publication.
TECHNICAL ADVISORY EXTENSION PROGRAM	33010000000000												
OO : Community engagement increased
